

Ping List Gift By: Mike Guminski

An **Exclusive Gift** from [Mike Guminski](#)

Attention Readers,

This is **My Exclusive 251 website Ping list** for your use in your [wordpress](#) blogs. This is the actual ping list that I use with my own personal websites. Whether the websites are original content sites or auto blogging sites I use this exact same ping list that you will find at the end of this report.

First let me tell you why I have created my own ping list. If you are using [pingoat](#) this service only offers you 50 websites to ping as you can (see below):

What in the world is Pingoat! ?

Pingoat is a service that [pings](#) or notifies a number of services that keep track of weblogs and publish them. By pinging, you let the services know that your blog has been updated and hence, they crawl and index your site, publishing your blog contents, thus increasing your blog's popularity.

[Adsense Arbitrage Report](#) [The GoatLog](#) [Pingoat tools](#) [Link!](#) [Recently updated blogs](#)

Get started!

Go Pingoat!

If you use a service like [Pinger](http://Pinger.com) you are limited to their list of 79 ping sites (listed on the next page you will see what it looks like after it is finished pinging). Unless you insert your own ping list in which case even then they only allow you to use up to 100 sites for them to ping at one time. Here is what the pinger site looks like before using there pinging services:

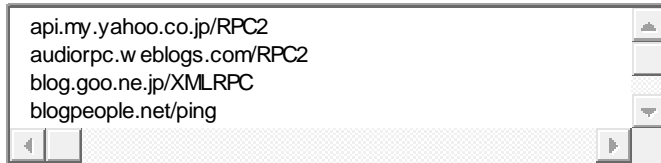

Website Name or Title:

Website Url: (Example: http://www.pinger.com)

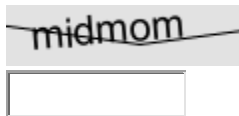

Category: (not required)

Ping List Gift By: Mike Guminski

Ping Services: (You can use our tested list below or use your own list! Maximum: 100)

Enter Image Text Below

As you can see above is the ping list that is already there for you to use and notice were it says above the box **"Ping Services: (You can use our tested list below or use your own list! Maximum: 100)"**

Here below is what you see after using there ping services:

USING 79 PING SERVICES... Please wait for this page to finish loading!

[« Back to the form](#)

These are the most commonly used services today. Yes there are many more out there but I don't think we need to go thru them all.

By now you realize the limitations with using these services. Not to mention that some of these services ping the exact same sites.

By using word press and inserting my ping list into your Update Services section you can simply copy and paste this new list into the field and then all there is for you to do is hit the save button and your done.

To get to your Update Services section in WordPress first go and open up your settings tab then click on writing. After that just scroll down the page until you see the Update Services section. From there you will see the box to insert the

Ping List Gift By: Mike Guminski

new ping list. Then as I stated before just hit the save changes button and you are good to go. From that point on every time you make a new post there will be a ping sent to the 251 sites.

I feel extremely fortunate to be able to share this with other people online trying to succeed. Please feel free to share this report with anyone you wish. This document is a locked document so unfortunately you will have to copy this list manually into notepad or where ever you wish to copy it to. You only have to do this once. Just **make sure you save your document** you copied it too. You don't want to have to re-type this list twice 😊. On that note here is your 251 site ping list below:

api.my.yahoo.co.jp/RPC2
